Visual Studio Code interface showing a Flask application setup. The Explorer panel on the left shows a project named 'SAMLE' with folders for static files and templates. The main editor shows 'app.py' with Flask code. The terminal at the bottom shows the command 'flask run' and its output, including a warning about development server usage and the URL 'http://127.0.0.1:5000/'.

```
from flask import Flask, render_template

app = Flask(__name__)

@app.route('/')
def hello():
    return render_template('.html')
```

Terminal Output:

```
